Prof Smilja Kalenic  
Editor in Chief  
International Journal of Infection Control

Dear Prof Smilja Kalenic,

We'd greatly appreciate if you consider our manuscript "Lack of sporicidal activity in diallyl-disulphide-oxide and a nanotechnology-product for sterilizing medical and dental instruments" by Cesar I Velázquez-Ramírez, Rogelio J Scougall-Vilchis, Leonor Sánchez-Pérez, A Enrique Acosta-Gío, for its possible publication in *International Journal of Infection Control*.

This manuscript presents results of original research, the text, or a similar one, has not been previously published in print or electronic format and is not under consideration by another journal.

Each author contributed substantially to this research's conception, design, laboratory work, analysis, interpretation, and manuscript writing. I warrant that the manuscript has been read and approved by all authors and that all agree to the submission to *International Journal of Infection Control*. None of the authors has any potential conflict of interest to disclose.

This study does not involve human subject participation and no IRB approval was required.

Sincerely,

A handwritten signature in black ink, appearing to read 'A. Enrique Acosta-Gío', is written over a large, irregular white scribble that obscures the printed name below.

A. Enrique Acosta-Gío, DDS, PhD
